SUMMARY

Computer Science undergraduate with hands on experience in **Full Stack Development** and **Data Science/ML** through **3 months of internships**. Experienced in building web applications and developing **ML/DL solutions, with skills in MERN, React.js, MongoDB, Python, RAG and Agentic AI**. Familiar with **Git/GitHub** and experienced in applying technology to real world problems across the Automotive and Technology domains. Seeking opportunities in Software Development and AI/ML.

EDUCATION

DIT University (Dehradun) Aug 2023 – May 2027
B.Tech, Computer Science & Engineering CGPA: 7.78/10

City Montessori School (Lucknow)
Sr. Secondary (ISC, Science - PCM) 2022 – 87.5%
Secondary (ICSE) 2020 – 86.4%

EXPERIENCE / INTERNSHIPS

Tata Technologies Ltd. | Tata Motors, *Full Stack Developer Intern* May 2026 – Jun 2026

- Engineered a full stack **EV charging station locator and slot-booking platform** using the MERN stack, featuring JWT authentication, geolocation-based station search and an interactive Leaflet map with real time availability.
- Designed RESTful APIs for slot booking and cancellation and built a rule-based recommendation engine with cost estimation, applying secure coding practices including **bcrypt hashing** and protected API routes.

Celebal Technologies**,** *Data Science Intern* Jun 2026 – Aug 2026

- Built ML pipelines using Random Forest, GridSearchCV, and Prophet for regression/forecasting, and CNN-based deep learning models for classification, plus agentic AI pipelines for task automation.
- Developed RNN/LSTM/GRU text generation models, a CNN-based autoencoder for image denoising, a **RAG document Q&A pipeline** and an **agentic AI assistant** with intent-based tool routing.

PROJECTS

Tata.ev Charging Station Locator | *MERN Stack, Leaflet, JWT* | *GitHub Link* | *Live Link*

- Built a full-stack EV charging locator with JWT authentication, an interactive Leaflet map showing real-time slot availability and **geolocation-based nearest-station sorting** using the Haversine formula.
- Designed a MongoDB schema with relational bookings (User, Station, Slot, Booking) supporting reservation, cancellation and a custom "mark as charged" flow.

ChainSmart – ESG E-Commerce Platform | *HTML, CSS, JavaScript* | *GitHub Link* | *Live Link*

- Developed a multi-page ESG-focused e-commerce platform with user onboarding, product management and a **real-time sustainability scoring system**.
- Designed a reusable, component-based CSS design system with responsive layouts, reducing duplicate code across pages.

OPEN SOURCE CONTRIBUTIONS

- **GirlScript Summer of Code (GSSoC):** Merged 8+ pull requests across 4 repositories, resolving issues and implementing features, with all contributions reviewed and approved by project maintainers.
- **Hacktoberfest:** Completed by merging 6 pull requests to open-source repositories, incorporating maintainer code review feedback prior to merge.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C, R

Full Stack: React.js, Node.js, Express.js, HTML5, CSS3, REST APIs, JWT

Databases: MongoDB, SQL, Database Normalization

ML / DL / GenAI: Machine Learning, Deep Learning, RAG, LLMs, LangChain, FAISS

Tools: Git, GitHub, VS Code, Postman, Linux, Windows

LeetCode: 300+ problems solved · Contest Rating: 1480 · 100 Days Consistency Badge

CERTIFICATIONS

- **Generative AI & Cloud Computing Foundations** (GDSC) · **Core Java** (OOPs, Collections, Exception Handling) (LearnQuest) · **Linux Fundamentals** (CLI, File System, Permissions) (LearnQuest) · **Database Management Essentials** (SQL, Normalization) (University of Colorado Boulder, Coursera).

LEADERSHIP / EXTRACURRICULAR

- **Management Team, Sphurti:** Managed on-ground coordination, logistics and hospitality for teams from other colleges, for the inter-collegiate sports fest.
- **Google Developer Student Clubs (GDSC):** Completed a Generative AI-focused learning track, earning a Certificate of Participation.
